

# Boland Pest Control

## Before/During and After Precautions

- Thank you for choosing Boland Pest Control to help you with the concerning pest problem.
- Kindly read sections below relating to the pest control service our well trained technicians will be performing at your premises to ensure customer satisfaction as well as effective and safe pest control.

### Treatment of Ants

Kindly do note that we schedule 3 treatments approximately 7 to 10 days apart for the effective treatment of ants.

**We highly recommend for inspections and treatments to take place early in the morning or late afternoon and not between 11h00 – 15h00 for the effectiveness of treatments.**

### Indoor treatment

- Please refrain from sweeping, washing, mopping or disturbing the areas where ants are active 24 hours before your scheduled treatment date.
- You may sweep clean 5 hours after treatment, but please do refrain from washing or mopping the affected areas that was treated for at least 24 hours.
- You will notice ants still being active for at least 2 to 3 days after the treatment, please do bear with this.
- Please note **NOT** to use any other insecticide on the ants or their places of activity, ants are highly intelligent insects and this will cause an emergency reaction to them, disturbing the treatment processes scheduled.
- Products being used indoors are completely safe for humans and pets, **BUT** please do cover any fish tanks with plastic while treatment is taking place and keep crawling toddlers from wet areas until dry.

### Outdoor treatment

#### Granule treatment

- We care for your children and loved ones and unfortunately treatment can only take place when there is an absence of crawling toddlers and/or dogs for at least 24 hours.
- Please refrain from sweeping, washing or disturbing the areas where ants are active 24 hours before your scheduled treatment date.
- Please do not water the affected areas in your garden that must be treated 3 hours prior to treatment and for at least 1 day after the treatment date to ensure effective pest control.
- Kindly do not sweep on patios for at least 2 days after the treatment and please do not wash with water for at least 1 day after the treatment date.
- You will notice ants still being active for at least 2 to 3 days after the treatment, please do bear with this.
- Please note **NOT** to use any other insecticide on the ants or their places of activity, ants are highly intelligent insects and this will cause an emergency reaction to them, disturbing the treatment processes scheduled.
- Kindly do understand that in cases of rain, treatments will be re-scheduled to another time or date.

#### Surface spray treatment

- This process is safe for all children and pets who love to play outside.
- Please refrain from sweeping, washing or disturbing the areas where ants are active 24 hours before your scheduled treatment date.
- Please do not water the affected areas in your garden that must be treated for at least 3 hours prior to treatment and water only 3 hours again after treatment.
- It is safe to sweep areas treated once dried up after the surface spray.
- You will notice ants still being active for at least 2 to 3 days after the treatment, please do bear with this.
- Please note **NOT** to use any other insecticide on the ants or their places of activity, ants are highly intelligent insects and this will cause an emergency reaction to them, disturbing the treatment processes scheduled.
- Kindly do understand that in cases of rain, treatments will be re-scheduled to another time or date.
